PROFESSIONAL OBJECTIVE

Machine Learning / Data Engineer

EDUCATION

Bachelor's Degree in Computer Science

Federal University of Espírito Santo (UFES)

June 2021 – March 2026

PROFESSIONAL SUMMARY

Computer Science graduate with strong experience in Machine Learning, Deep Learning, and Data Science, with practical experience in developing generative models, data analysis, and AI-based solutions.

Proficient in Python and experienced with modern architectures such as Transformers, GPT models, and Generative Adversarial Networks (GANs). Also experienced in backend development, process automation, and database systems.

Recognized for systemic thinking, adaptability, leadership, and teamwork. International academic research experience and participation in projects published in IEEE conferences. Strong background in mathematics and computer science, with particular interest in computer networks and security.

PROFESSIONAL EXPERIENCE

Mindworks (Current Position)

Start Date: October 2025

Position: Automation Assistant

Responsibilities: Development of corporate process automation systems using n8n and database technologies. Implementation of automated workflows and integration between services and APIs. Optimization of operational processes through technology-driven and logic-based automation solutions. Integration of internal systems and external platforms to streamline business operations.

Federal University of Espírito Santo / Università di Torino – Academic Research

Start Date: October 2023

End Date: July 2025

Position: Deep Learning Researcher

Responsibilities: Research on generative models applied to time series and network traffic data. Training and evaluation of architectures such as GANs, Transformers, and modern AI models. Development of metrics to evaluate privacy leakage in generative models. Publication of research results in national and international conferences (IEEE WF-IoT 2024 and IEEE ISCC 2024). Participation as a visiting research student at Università di Torino, Italy, funded by an international research scholarship from FAPESP.

Nicchio Café S.A. Exportação e Importação

Start Date: August 2024

End Date: April 2025

Position: Software Developer

Responsibilities: Development and implementation of a web server for managing business operations and foreign exchange contracts. Backend development using Python (Flask) with SQL database integration. Development of features using JavaScript. Contribution to the structuring of internal systems for automation and organization of business processes.

LANGUAGES & TECHNICAL SKILLS

Languages

Portuguese: Native

English: Fluent

Italian: Intermediate

Spanish: Basic

Programming Languages & Technologies

Python, C, C++, Java, SQL, Linux, NumPy, Pandas, PyTorch, Jupyter Notebooks, n8n, GitHub

ADDITIONAL COURSES & CERTIFICATIONS

Deep Learning Courses – DeepLearning.AI

SBRC 2024 Hackathon – 2nd Place: Blockchain application for smart cities.
